Small Adapted Car

Film canisters may be used to create easy hold grips for many items. They are available free from any store that does film processing.

Materials:

Discarded 35 mm film canister
Hot glue
Small car

Directions:

Hot glue the top cover of the film canister to the roof of the car.

Implementation:

The film canister is attached for the young child who may be unable to propel the car without a handle. The bottom of the canister may be removed for the child who does not require the “handle” without interfering with the car’s function.
