Creative Use for Daily Contact Lenses

Daily contact lens cases make a great combo page fluffer/turner. You can glue them on to board book pages or the insides of flap book flaps. The indentation for the contact makes a nice space for a small finger or hand to lift the page. You can also add pom poms to each contact container to color code pages and soften plastic edge.

Idea submitted by Kathleen Sadao, Ed.D from the Sacramento County Office of Education SEEDS Project
