Sandbox Communication System

Cat scratching posts are not just for scratching, they make great communication devices too! A carpeted cat scratching post can be used as a symbol holder during play in the sandbox. After you're done, use a vacuum to clean the sand off. This device isn't just for the sandbox. It's also great during playtime on the floor.

Materials:

Carpeted cat scratching post
Velcro
Communication symbols

Directions:

Use Velcro to attach communication symbols to the scratching post. The rough side of Velcro will stick to the carpet.
